

# MSc Engineering

## Modules of the specialization:

Project Management  
Human Resource Management  
Fundamentals of Management  
Finance and Economics  
Lean Management  
Technology Management  
Designing and Project  
Artificial Intelligence in Business  
Processes  
Optional Module (1)  
Optional Module (2)

**The MSc Engineering** specialization uses scientific and technical knowledge that graduates can apply not only in leadership and management activities and functions, but also in corporate management positions. Key skills for graduates include analytical thinking skills, designing and improving processes in society and, last but not least, a basic orientation in the field of artificial intelligence, which aims to make tasks more efficient and facilitate human work.

**The MSc Engineering** includes the following beyond the basic and optional modules: Technology Management, Designing and Project, Artificial Intelligence in Business Processes.
